ADITYA PRAKASH GUPTA

Kanpur, Uttar Pradesh | adityaprakashgupta76@gmail.com | linkedin.com/in/adityaprakashgupta07 | github.com/Aditya23011c

SUMMARY

AI/ML-focused Computer Science undergraduate with hands-on experience building AI-powered prototypes across NLP and web development. Participant in 4 hackathons including NASA Space Apps Challenge and Smart India Hackathon, with projects spanning applied machine learning, multi-agent AI, and interactive web applications. Proficient in Python, Scikit-learn, NLTK, Streamlit, and REST API integration. Seeking an AI/ML or Software Development internship.

SKILLS

Languages: Python, Java, HTML, CSS

AI / ML: Machine Learning, Natural Language Processing, Supervised Learning, Regression, Classification

Libraries & Frameworks: Scikit-learn, NLTK, Pandas, NumPy, Streamlit, HuggingFace Transformers

APIs & Cloud: Google Gemini API, REST APIs, Netlify, Render.com

Dev Tools: Git, GitHub, VS Code, Jupyter Notebook

PROJECTS

Farm Rakshak – AI Livestock Intelligence Hub | HTML, CSS, JS, Gemini API 2026

Hackathon Project — Electrothon 8.0, NIT Hamirpur | GitHub | Live Demo

- Built a single-page AI-powered livestock health platform using Google Gemini 2.5 Flash API, enabling farmers to diagnose animal diseases via image upload with multilingual support (English/Hindi).
- Architected a multi-agent AI pipeline with specialized agents for disease detection, thermal vision analysis, and medicine recommendation.
- Deployed full stack on free-tier infrastructure (Netlify + Render.com) with zero-cost backend, making the platform accessible without internet-heavy setups in rural areas.
- Presented to a panel of judges at NIT Hamirpur; project was selected for final-round evaluation among 100+ hackathon submissions.

AI NLP Playground | Python, NLTK, HuggingFace, Streamlit 2024

GitHub | Live Demo

- Built and deployed a modular NLP toolkit integrating 6 utilities: text summarization, language translation, named entity recognition (NER), keyword extraction, sentiment analysis, and a rule-based chatbot.
- Integrated HuggingFace transformer models for summarization and translation.
- Designed plugin-style modular architecture enabling new NLP components to be added independently without refactoring existing code.

HACKATHONS & COMPETITIONS

Electrothon 8.0 – NIT Hamirpur March 2026

- Built Farm Rakshak as team lead over a 36-hour sprint; handled full frontend, Gemini API integration, and agent architecture design.

NASA International Space Apps Challenge 2024

- Built a weather prediction model using 3 NASA datasets — MERRA-2 (atmospheric reanalysis), POWER (surface meteorology), and GPM (global precipitation) — to forecast temperature and precipitation; achieved MAE of 2.3°C using Random Forest Regressor.

KodeKalesh Hackathon 2024

- Built CognitoLab, a web-based psychology lab platform enabling users to perform standardised psychological experiments interactively in the browser — designed for research accessibility and ease of use.

Smart India Hackathon (SIH) 2024

- Built KrishiMitra, an agriculture-focused education app designed to bridge the gap between farming knowledge and rural students; submitted working prototype and cleared internal college-level evaluation round.

CERTIFICATIONS

- Oracle AI Foundation Certification — Oracle, 2024
- Programming in Java — NPTEL, IIT, 2024
- Cyber Security and Privacy — NPTEL, IIT, 2024
- Data Visualization with Python — IBM / Coursera, 2023

EDUCATION

Maharana Pratap Engineering College (MPEC), Kanpur | AKTU 2023 – 2027

- B.Tech in Computer Science Engineering | CGPA: 7.37
